Water damage dry out

In continues to my visual inspection in the property, I found that the supply line to the toilet burst and flooded the entire house, the carpets are saturated with water, the kitchen cabinets and both vanities are damaged, the drywall is wet about one foot high and the enclosed patio is flooded as well.

- Extracting the water from all the floors (carpet, tile).
- Dispose the carpet pad.
- Remove the base boards all around the house.
- Remove toe kick from cabinets.
- Removing all the damaged drywall, insulation and dispose it (about 2feet high).
- Setting up air blowers to evaporate the moister.
- Operating Dehumidifier to dry the moister.
- Applying antimicrobial on walls and floors.
- Haul all the debris.

The price for the dry out job: \$4,980.00
the process will take between 3-4 days.

The work would start as soon as 911 RESTORATION would get a signed work authorization.

Thank you for choosing 911 RESTORATION.

Best regards,

Roni Dahar
Operations Manager.
